Taking responsibility of a variety of tasks

Competitive remuneration package

Experienced, dynamic, diverse, & agile team

Modern work environment with flexible working hours

Company Pension with focus on sustainable investments

B-Horizon is an internationally active company with business divisions for development of microelectronics and sensors. We offer IC consulting and design for the development of individual and innovative semiconductor solutions in the automotive and consumer goods industry. B-Neo, our next generation smart sensor system, can be applied in various areas, as car seats, athletic shoes, or gaming suits.

Our passion for technology and extensive experience in the development of microelectronics and sensors, as well as our wide range of services, are the foundation of our success. Thereby our customers benefit from our working style: with the agility of a start-up, combined with the professionalism of a benchmark company.

Are you interested in new professional horizons?

We are looking forward to your application by E-Mail!
